

DISCO LIGHTING

PAR 36 PIN SPOT

This light has been a staple fixture in disco lighting for decades.

Commonly used as a light source for mirror balls, it produces a narrow focused beam of light useful in many applications.

Pin spots use a par 36 4515 low voltage lamp and include a heavy duty transformer included.

Coloured gel cups can be placed in front of the lamp converting the pin spot to a coloured light.

FEATURES

Power: 240V AC

Power Consumption: 36W

Fuse: M205 500mAT
