Marshall G10 MKII Combo Amplifier

The biggest little practice amp in the world. The sturdy, compact Marshall MG10CD Combo Amp boasts 2 channels, a custom-voiced 6-1/2" speaker, and 10W of Marshallized power.

The clean channel gives you shimmering pristine tones, and when cranked produces a musical crunch perfect for the blues. The overdrive channel kicks in a bunch of the distortion that has made the Marshall name. Emulated headphone output gives you great tone and mutes the speaker.

Includes CD input.

The Marshall MG10CD Combo Amp is a great amplifier for the studio, too.
